

LID

Lightning Isolator for Data

Specification

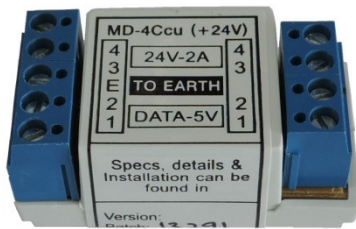

Data Input	Terminal
Protection	Data DC5V
Data Output	Terminal
Dimensions (W x H x D)	48 x 27 x 19mm
Weight (g)	18g

Key Features

- Protect Data
- Substantial savings on the cost of the cable itself

LIPS

Lightning Isolator for PTZ Camera (Power + Data)

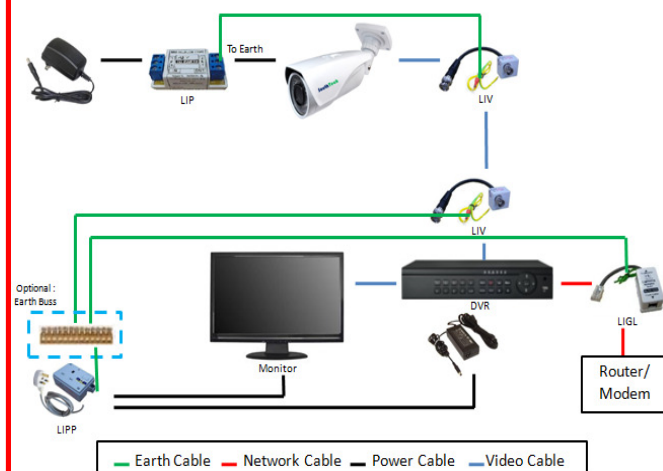

Specification

Power&Data Input	Terminal
Protection	Power AC24V 2A + Data
Power&Data output	Terminal
Dimensions (W x H x D)	48 x 27 x 19mm
Weight (g)	18g

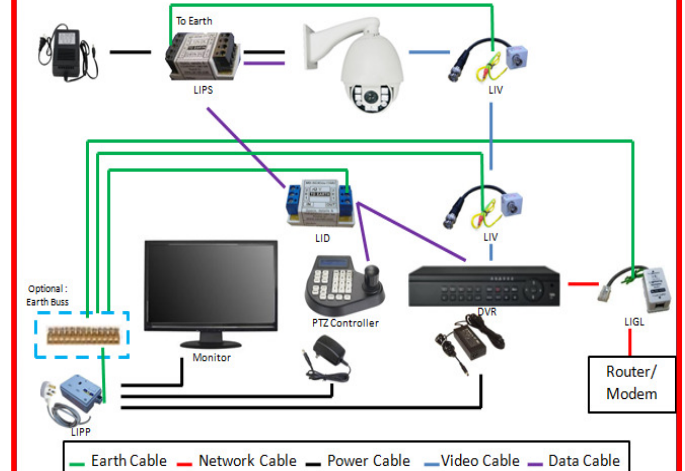

Key Features

- Protect Power + Data
- Substantial savings on the cost of the cable itself

Normal Analogue Installation Guide

PTZ Analogue Installation Guide

- Please note that the earth is a Floating Earth - Patented Technology used together with this range of Lightning Isolator only, which should never be mixed with conventional grounding earth or any other earth as mixing it would result in undesirable effects - worst case nullifying the protection.
- The earth cables have to be properly connected to ensure maximum protection. Earth cables should be as short as possible.
- All green lines must go directly (not looped) through this ground reference at the power lightning isolator or earth buss where applicable.
